

I'm one of the almost 3 million New Jerseyans who have registered for and value NJ's Do Not Call Program. I'm upset that, most likely due to its success, our law is under attack from telemarketers who want our state restrictions weakened, and that the FCC is contemplating overturning New Jersey and other states' Do Not Call laws that are stronger than the federal program. I am adamantly opposed to any weakening of the program.

Please stand by me and the millions of citizens in the states affected, not the special interests.

Thank you.
John W. Klotz
